

## Georgie Spring Barley

- I. Georgie is a two-rowed, rough awned spring barley that is short, with mid-season to late maturity. Its growth habit is semi-erect with a tapering head. Georgie has long hair rachilla, white aleuron and a glabrous ventral crease. It is resistant to lodging, and resistant to European leaf rust races.
  
- II. Georgie is adapted to the northwestern Great Plains areas of the United States.
  
- III. Distinguishing characteristics of this variety are its bevel lemma base and absence of ventral groove hair. Strong anthocyanin in the lemma nerves during growth.
  
- IV. Breeder seed will be maintained by North American Plant Breeders. Certification seed classes will be restricted to Breeder, Foundation, Registered and Certified.
  
- V. Application will be made for Plant Variety Protection. Still pending is a decision as to whether or not to specify sale only as a class of certified seed.
  
- VI. Certified seed will be offered for sale in 1975.
