

**CDC STRATUS (TR 128)** Rough awned, normal height, good lodging and shattering resistance, mid-season maturity, out-yields other 2 row malts in low-mid rainfall zones. Susceptible to leaf scald and septoria. Higher test weight and plumper than Harrington, interim malt registration. Excellent bushel yield and quality, used as feed barley in PNW. Released 1994. PVP Quality Assured Seeds Canada, Ltd./PNW. Distribution by Laughlin Trading, Inc.
