

Maintenance of seed stocks for Plant Breeders 1's spring barley "~~Duke~~". SPAULDING

About 200 single heads of Plant Breeders 1's two row, feed, spring barley "Duke" are planted as head hills. Off types are discarded. Remaining hills are bulked creating the breeders seed generation. Plant Breeders 1 cooperates with various Crop Improvement Organizations as well as with participating seed companies to produce subsequent generations of certified seed. Foundation, registered and certified seed are recognized.
