DATE: Friday August 20, 2010
TO: Users of Oregon Certified Cereal Seed
FROM: John J. Zielinski, Oregon Seed Certification Service
SUBJECT: 2010 Final List of Cereal Public Variety Production

Attached is a list of growers and fields of the public varieties of Barley, Cereal rye, Club wheat, Durum wheat, Oat, Red oat, Triticale, and Wheat. Applications have been submitted for seed certification inspection of these fields. Certification is not complete until the seed production meets field standards, seed standards, and is properly tagged with Certification tags, or receives a Certificate of Final Certification.

Field and seed standards for Certification are in the 2010 Oregon Certified Seed Handbook or the OSCS Web site at <http://seedcert.oregonstate.edu>. The handbook is available from OSU County Extension offices and from the address on this letterhead. Cereal seed that has not completed the certification process can be moved under certain circumstances; correct documentation for such a transfer is the certificate for "Transfer of Seed Pending Final Certification." Certification tags, Certificates of final Certification, and the Transfer of Seed Pending Final Certification are important documents for determining the certification status of seed, and for providing seed source documentation for further increases.

As of August 20, 2010, there are 21,026 cereal acres applied for Certification, inclusive of public, private, OECD, and experimental varieties. This compares to 20,571, 17,914, 14,521, 13,742, 14,705, 15,106, 14,209, 12,589, 8,165 and 8,524, acres in the previous ten years.
