

# Norris

## Description for Crop Improvement

### Norris (MTCL0316)

**Norris** is a high-yielding, conventional height hard red winter wheat Clearfield cultivar. MTCL0316 has high test weight, good crop tolerance to herbicide, and is relatively early in heading compared to Montana cultivars. Grain protein of MTCL0316 is relatively low and milling and baking quality characteristics of MTCL0316 are acceptable. MTCL0316 has a middense, inclined, awned head with red to brown glumes at maturity. The line contains a white-chaffed variant at a frequency of <7 per 10,000 plants and a tall, dark-chaffed variant at a frequency of <2 per 10,000 plants.
