PLANT TRAITS

Stem colour at maturity:	-	Stem thickness:	-
Plant height at maturity (cm):	122	Lodging resistance:	-
Time to maturity:	medium		

LEAF TRAITS

Leaf colour:	-	Leaf size:	medium
Leaf shape:	arrow-shaped		

FLOWER TRAITS

Bud colour:	-	Flower colour:	white
Time to flowering:	45	Flower size:	-
Terminal flower density:	semi-compact		

SEED TRAITS

Seed colour:	black	Pericarp adherence:	-
Seed weight (g/1000 seeds):	34.6	Protein content (%):	13.7
Seed shape:	well filled	Groat (%):	-
% seeds with wings:	0	Groat density:	-

DISEASE/PEST REACTIONS

Downy mildew (Peronospora ducomati):	susceptible	Smut (Ustilago reticulata):	-
---	-------------	------------------------------------	---

AGRONOMIC TRAITS

Lodging resistance:	-
----------------------------	---

QUALITY CHARACTERISTICS

Protein content (%):	13.7
-----------------------------	------
