

LCS Jet is a Hard Red Winter wheat developed by Limagrain Cereal Seeds and released in 2014. LCS Jet is adapted to Eastern Washington in irrigated production and in areas receiving >16" of precipitation, and the Snake River Plain of Idaho. Yield performance is exceptional and end-use quality is above average. Winter hardiness is excellent and straw strength is very good. LCS Jet is awned, one day earlier heading than LCS Azimut, and four inches taller than LCS Azimut. LCS Jet may contain up to 1 per 1000 tall plants, up to two spike lengths above the main canopy, and up to 1 per 1000 awnless plants. Seed of LCS Jet may contain up to 0.75% white wheat seeds.

Seed may only be sold through license agreement. Plant Variety Protection will be applied for.
